

ALL-NEW PCD CUP WHEELS FROM GENERAL TOOL

BIGGER PCDs. BIGGER PERFORMANCE.

The 2nd generation **PCD Cup Wheel** from General Tool feature **larger PCDs for longer life** when removing floor coatings, including epoxies and glues. General Tool also offers **PCD cup wheels with a protective segment, to keep the smaller, more aggressive PCD** from becoming dislodged. **Polycrystalline diamonds are ultra rough** and are great for removing coating without loading up or smearing. These cup wheels can be used wet or dry, and are available threaded (5/8-11) or unthreaded with a bushing (7/8-5/8).
