

# HIGH PERFORMANCE WALL SAWING POWERED BY ZENESIS™

Wall saws are designed to cut reinforced concrete as well as brick and block walls to provide openings for doors and windows. They are also used in demolition and renovation. **ZENESIS™ Wall Saw Blades**, with *patterned diamond technology*, are available in **two distinct designs** for this demanding environment. Each provides, **fast clean cuts** and **long blade life** not available on traditional saw blades from other suppliers.

- U segment design
- Laser welded for more heavily reinforced concrete and harder aggregates
- 12mm segment height for longer blade life
- Core with narrow keyholes gullets for less chipping
- Diameters from 14" - 48"
- Can be purchased with Longyear flush cut bolt pattern
- Can be purchased with GDM flush cut bolt pattern
- Split segment design for faster cuts
- Brazing technology
- 10mm segment height
- Cores with U gullets for quieter operation
- Wide gullets provide faster cutting
- Diameters from 14" - 48"
- Can be purchased with Longyear flush cut bolt pattern
- Can be purchased with GDM flush cut bolt pattern
